---------------------------	----

INTRODUCTION

The Prairie Precision Order tool is a resource that has been developed for our dealer/reseller network. The main purpose of this tool is to make ordering parts and subscriptions easier and to also allow the tracking of these orders.

This guide will go through how to place orders, repairs and use the quote tool.

If you have any suggestions for us on how to do something better please feel free to share it. We understand that most of our dealers only order from us at certain times of year and may forget how to do it. Use this guide as your resource and always feel free to contact us.

LOGIN INFORMATION

USER INFO

The address of the order tool is <http://order.prairieprecision.com>

Your individual username has been set by PPN. If you need your information or your password please contact us. If you would like to add another user to the database you must contact PPN as this is a manual process.

GENERIC LOGIN

We have created a generic login that will allow a user to see the Quote Tool to price a system out.

When logged in with this information the user will only be able to choose the quote tool tile, if anything else is selected it returns them to the login page.

Username: Prairie

Password: Quote

CUSTOMERS

MANAGE CUSTOMERS

Order Tool 2.0 has the ability to manage customer modems and dealer inventory. You can move modems in and out of a customer account with ease. As well you can add, delete and manage your customers accordingly.

Adding a Customer

1. Click on the “Customer” tab (Figure 1)
2. Click on “New”. Now you will be able to add their name and then hit done (Figure 2)

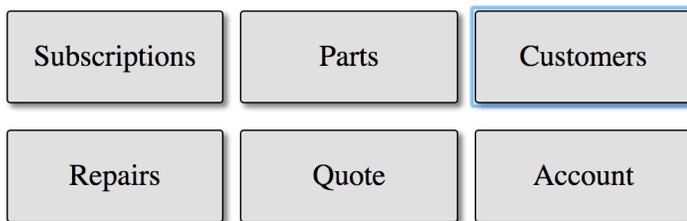

Figure 1

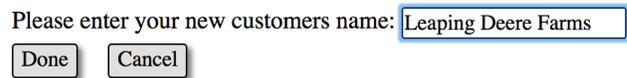

Figure 2

MANAGE MODEMS

Once this customer has been created a new page shows up that has all the dealer modems in inventory that can then be moved to this new customer account. **Modems in dealer inventory are assigned by PPN** Contact us for any discrepancies

Moving Modems

1. You will see the customer name at the top which can be updated at any time (Figure 3)
2. Select a modem in the “Stock Modems” category and move to customer
3. Once done you will see this modem now be in the “Customer Modems” category (Figure 4)
4. Hit done to take you back to the

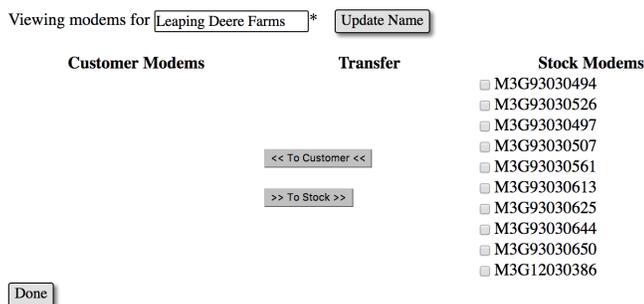

Figure 3

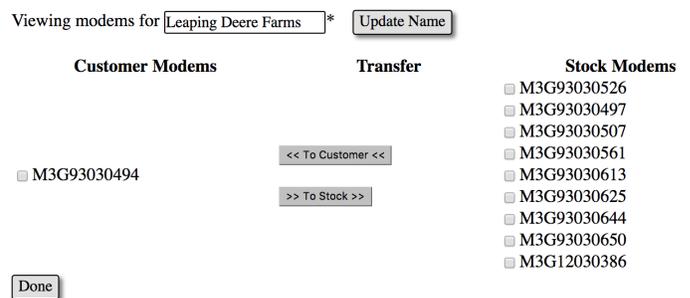

Figure 4

SUBSCRIPTIONS

Once the customer has been created and the modem moved to their own customer inventory then the order tool takes you right away to the add a subscription page to this modem/modems.

SUBSCRIPTION STATUS

1. On this modem page you will be able to see the current modem subscription status as a glance (Figure 5)
2. You will also be able to see the subscription history of this selected device
3. To add a subscription, select the modem and hit “Add Subscription”

ADDING A SUBSCRIPTION

1. Select the “Sub Type” that your customer has ordered.
2. You can change the “Start Date” of this subscription as well
3. When changes are made to the “Sub Type” or “Start Date” the order tool will reload the page and update the information on its own (Figures 6 & 7)
4. Enter your PO#

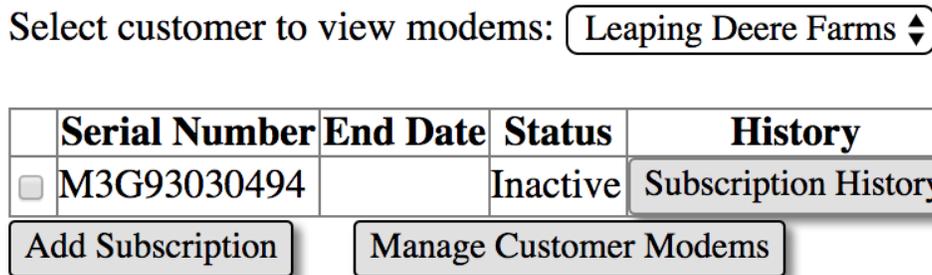

Figure 5

Select sub type, quantity, and start date then press submit to order subscriptions.

Serial Number	Sub Type	Quantity	Start Date	End Date
M3G93030494	SELECT	1	2017-01-23	

PO: \$0.00

Figure 6

Select sub type, quantity, and start date then press submit to order subscriptions.

Serial Number	Sub Type	Quantity	Start Date	End Date
M3G93030494	Ag Season RTK	1	2017-01-23	Dec 31, 2017

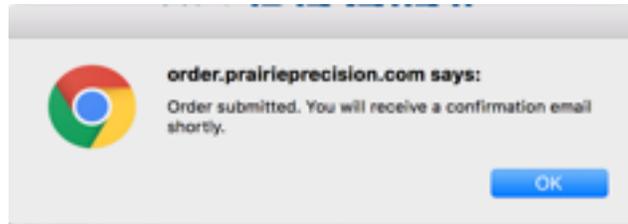

PO: \$1,500.00

Figure 7

SUBSCRIPTIONS

EMAIL CONFIRMATION

1. Once you hit  your browser will give you this message

2. After a minute you will get an email (Figure 8) with your order information. This can be copied to anyone within your organization that you choose.
3. If this was an order for a demo subscription you will also see how many Demos you have left in your dealer organization

Please find below an order from James Willis at AGLAND.

Customer: Demo

Modem M3G93030477: 1 x RTK-AG Season - activated from Jan 23, 2017 to Dec 31, 2017.

PO: TEST

Total MSRP: \$1,500.00

1 demo subscription was used for this order. You have 3 remaining.

Figure 8

PARTS

NEW PARTS ORDER

1. Login to Order Tool and click on the “Parts” tile
2. Choose the parts you want to order from the drop down list (Figure 9)
3. Change the quantity and then hit add item
4. The prices in the order tool are list price only. If you want to know your dealer cost then just subtract 25% (Figure 10)
5. Make sure to fill out the box or the order will not be processed
6. Once that is done, hit the box to place the order

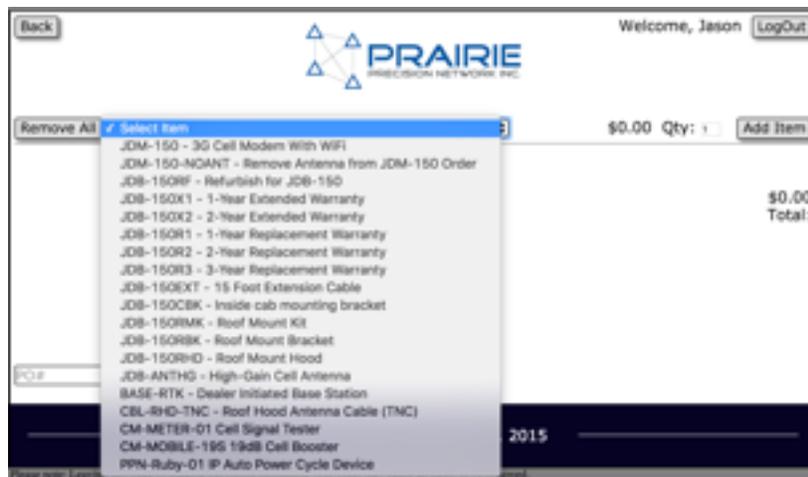

Figure 9

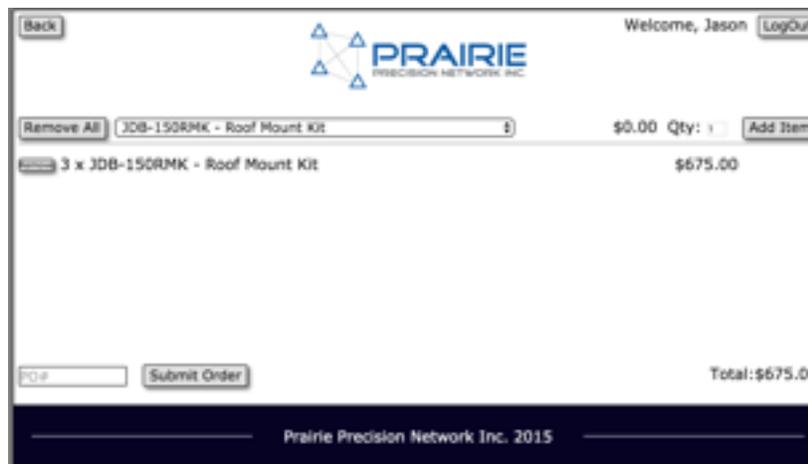

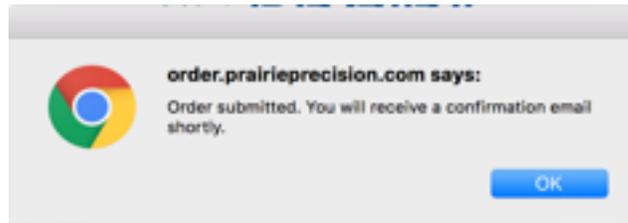

Figure 10

PARTS

Email Confirmation

1. Once you hit  your browser will give you this message

2. After a minute you will get an email (Figure 11) with your order information. This can be copied to anyone within your organization that you choose.

Please find below an order from James Willis at AGLAND.

1 x JDM-150 - 3G Cell Modem With WiFi (Includes high-gain cell antenna) -
\$1,915.00

PO: TEST

Total MSRP: \$1,915.00

Figure 11

REPAIRS

CHECKING REPAIR STATUS

1. Login to Order Tool and click on the “repair” tile
2. Once the page loads you will see any pending repairs (Figure 12)

The screenshot displays the user interface for checking repair status. At the top left is a "Back" button. In the center is the Prairie Precision Network Inc. logo, which consists of a network diagram of four blue triangles connected by lines, followed by the text "PRAIRIE PRECISION NETWORK INC.". To the right of the logo is the text "Welcome, jriseley" and a "LogOut" button. Below the logo is a "Request New Repair" button. Underneath this is the instruction "Please find your RMA history below." followed by a list of repair records:

M3G11040024:	Klassen Agri	Status: RMA request received
M3G11040153:	U of S	Status: Repair complete, awaiting shipment from PPW
M3G11040165:	Darius Hofer	Status: Repair complete, awaiting shipment from PPW Date In: 11/19/2015
M3G12030226:	Demo	Status: Repair complete, awaiting shipment from PPW Date In: 6/18/2015

At the bottom of the page is a dark blue footer bar with the text "Prairie Precision Network Inc. 2015" centered between two horizontal lines.

Figure 12

REPAIRS

SUBMITTING A REPAIR

1. If you have a new repair to submit, hit the **Request New Repair** button
2. Select the modem you are sending in for repair (Figure 13)
3. Select the modem that you want to move the subscription over too (Figure 13)
4. IMPORTANT: Make sure to fill out where you want the modem repair sent back too
5. Describe what the modem issues are and then hit **Send Repair Request**

The screenshot shows a web interface for submitting a repair request. At the top left is a **Back** button. In the center is the **PRAIRIE PRECISION NETWORK INC.** logo. At the top right, it says "Welcome, jriseley" next to a **LogOut** button. The form contains the following fields:

- Repair Modem:** A dropdown menu with the value "M3G11040017".
- Loaner Modem:** A dropdown menu with the value "M3G93030723".
- Return Location:** A text input field containing "Stettler, AB".
- Description:** A large text area with the prompt "Please provide a brief description of the modem's issue below." and the text "Modem Power Lights will not come on".

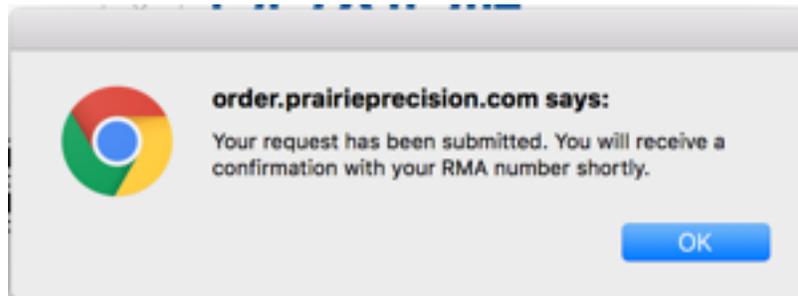

At the bottom of the form is a **Send Repair Request** button. The footer of the page reads "Prairie Precision Network Inc. 2015".

Figure 13

REPAIRS

EMAIL CONFIRMATION

1. Once you hit the  button, your browser will give you this message

2. After a minute you will get an email (Figure 14) with your repair order information and instructions for shipping
3. IMPORTANT: Make sure to print out this email and include with your modem return. If not included the repair will not be processed
4. IMPORTANT: ONLY ship the modem that is to be repaired. REMOVE SIM and do not ship antenna, shroud or extra cables with the modem.

Please find below a repair request from Jason Riseley at CERVUS

Contact:	403-323-0232
RMA:	16042101
Modem:	M3G11040017
Loner Modem:	M3G93030723
Return To:	Stettler, AB

Reported Issue

Modem Power Lights will not come on

Please ensure to print a copy of this e-mail and include it with the modem being returned for repair.

Only ship the modem to be repaired, any accessories (antenna etc) may not be returned with the repaired modem.

Please ship the modem to:

Prairie Precision Network
 #110 - 201 38 ave NE
 Calgary, AB
 T2E 2M3

Figure 14

QUOTE

QUOTE TOOL PURPOSE

The purpose of the Quote Tool is to make sure that a dealer employee can quickly share with a customer the cost of a RTK system upgrade. This should be used in conjunction with our payback calculator that can be found at www.prairieprecision.com/payback.html

This tool can also be used to quote a traditional RTK system as well as the John Deere upgrades are all the same.

GENERIC LOGIN

We have created a generic login that will allow a user to see the Quote Tool to price a system out. When logged in with this information the user will only be able to choose the quote tool tile, if anything else is selected it returns them to the login page.

Username: Prairie

Password: Quote

QUOTE

QUOTING A SYSTEM

1. Login to Order tool and select the “Quote” tile
2. Once it loads you will see the following screen

[Home](#)

 Welcome, Jason [LogOut](#)

Use the tool below to find the upgrade cost and annual cost for upgrading to Prairie Precision RTK

Upgrading from	<input type="text" value="SF1 SF3000"/>	Dealer Margin	<input type="text" value="25"/> (%)
Number of Units	<input type="text" value="1"/>	JD Exchange Rate	<input type="text" value="30"/> (%)
PPN Subscription Length	<input type="text" value="Ag Season RTK"/>	Exchange Bonus	<input type="text" value="1"/> (%)
Cell Signal Booster <input checked="" type="checkbox"/>	<input type="button" value="Calculate"/>		

*JD upgrade provided by your Deere dealer.

**Cellular data cost is calculated assuming \$45 per month of an active RTK subscription. This may vary per cell provider.

**Cellular data plans to be set up by customer.

3. You will now be able to select what you are upgrading from, the number of units and the subscription length you would like to quote
4. Cell Signal Booster is quoted by default. If you DO NOT want to include a cell booster you can deselect it on this screen
5. Next select the margin you want to quote and the current exchange and exchange bonus if any
6. Once done hit

QUOTE

QUOTE TOTAL

1. Once you hit calculate the Quote totals will now show as below

Please see the table below for cost to upgrade **1 unit** from **SF1 SF3000** to RTK.

JD Upgrade Cost*			
090APC	SF1 to SF2 Ready (SF3000)	963K963	\$5,285.28
7305PC	RTK Activation (SF3000)	463K468	\$4,624.62
049FPC	Autotrac Activation Upgrade (For 2630 if required)	742K47	\$330.33
PPN Upgrade Cost			
JDM-150	3G Cell Modem w/ Wifi	251K436	\$1,915.00
JDB-150RMK	Roof Mount Kit	751K68	\$225.00
RTK-AG Season	Network Subscription Cost	001K125	\$1,500.00
CM-MOBILE-30S	Cell Signal Booster	502K32	\$310.00
	Cell Data Cost (Customer must provide)		\$360.00**
Totals			
Total First Year Cost:			\$14,550.23
Recurring Yearly Cost:			\$1,860.00

Reset

*JD upgrade provided by your Deere dealer.

**Cellular data cost is calculated assuming \$45 per month of an active RTK subscription. This may vary per cell provider.

**Cellular data plans to be set up by customer.

2. At the top of the page you will notice how many units you are quoting and what you are upgrading the system from.
3. The first part will be the John Deere upgrades that are required. Keep in mind that the SF1 to Autotrac activation may NOT be needed. Check with your Precision Ag team.
4. The PPN upgrade is set at retail prices and does not change according to your margin inputs.
5. You can also mount the modem inside the cab which will allow you to not have to purchase the roof hood but instead a cab bracket which is roughly the same price.
6. Multi Subscriptions will be added and discounted accordingly if quoted
7. Cell Data Cost is just a suggestion as these prices change without notice and are NOT provided by PPN

ACCOUNT

The “Account” tool will be used for you and your dealer group to manage users and other admin features with PPN.

This tool will continue to be developed and be launched at a later date
